

Not every device will conform to the dimensions given. Slight variations may occur. On demand, production of a textured surface (reference LST).

SHAPE AND CONSISTENCY OF A TESTICLE

Various sizes corresponding to patient morphology

Our sterile and single use testicular implants are sold by unit.

CONTINUITY Manufacturing process developed throughout the last 26 years.

RELIABILITY Chemical and biological evaluation of raw materials then microbiological evaluation of each batch. Visual and technical controls on 100% of implants at each step of the manufacturing process.

TRACEABILITY Each implant identification number inseparable from its reference allows traceability from the raw materials up to the implantation. We introduce our new bar code system GSI-128 to improve everyday life.

SERENITY Highly qualified staff working in clean room.
